PROJECTS

Sales & Inventory Management System — Viktoria's Bistro

2024 -2025

Capstone – Lead Programmer

- Managed of 4 developers in building a POS and inventory management web application with role-based dashboards, including admin analytics, kitchen order tracking, and customer ordering modules.
- Designed and implemented the platform's UI/UX and integrated the Lalamove API for delivery and logistics functionality.

BabyGuard — IoT Baby Monitoring System

2024

Lead Programmer

- Won 1st Place (IT Division) at the *Exploring the Future of Robotics* competition and received awards for Best Project, Best Application, and Best App Designer.
- Led a team of four in developing Baby Guard, an Arduino-based smart crib equipped with moisture, sound, motion, and temperature sensors, automated swing control, and lullaby playback features.
- Designed and developed a web-based dashboard for real-time monitoring, caregiver notifications, and system management.
- Created the UI/UX design using Canva and contributed to the design and construction of the smart crib prototype.
- Collaborated with team members to integrate hardware components, sensor monitoring, and web-based functionalities into a complete infant care solution.
